Coffee Shop Sales Dashboard(Summary)

1. Sales Insights

- March recorded the highest sales.
- Sales remained stable across most months.

2. Product Insights

- Latte generated the highest revenue.
- Espresso generated the lowest revenue.

3. Payment Insights

- 94.68% of customers paid using Card.
- Only 5.32% used Cash.

4. Weekly Insights

- Revenue remained consistent throughout the week.
- No major sales drop was observed.

Recommendations:

- Promote Latte through combo offers.
- Increase marketing during lower-performing months.
- Encourage digital payments.
- Review low-selling products for promotional offers.

Conclusion:

The analysis shows that the coffee shop generated 11.94K in revenue from 376 transactions across 8 coffee products. Latte was the highest revenue-generating product, while card payments accounted for almost 95% of all transactions. These insights can help the business improve product promotions, inventory planning, and marketing strategies.
